

Editor's Page

Seven always has been my lucky number. With this, the seventh issue of the *Journal*, my faith in the number seven is renewed.

Volume Seven culminates a year of mutual effort in the publication of the *Journal* between the Federal Energy Bar Association and the National Energy Law and Policy Institute of the University of Tulsa Law School (NELPI). In a word, the arrangement has exceeded expectations. The student editors have exhibited a high degree of interest, motivation and ability. In addition to "bluebooking," the students have produced two published case notes and numerous suggestions to improve the overall quality and to reduce costs of the *Journal*.

Much of the praise for the effective association of the *Journal* with NELPI and the excellent performance of the students is attributable to Professor John Lowe. In addition to being an important scholar, Professor Lowe is an energetic motivator and effective administrator.

Although Volume Seven is not funded by the charitable foundation conceived by Richard Tiano and fully supported by the Executive Committee of our Bar Association, the past year has been a period in which a great deal of work in this area has been done. I am confident that when I next author this page, I will be able to report that the foundation has acquired a *corpus* and has begun contributing to the cost of publishing the *Journal*.

Volume Seven also reflects some important personnel changes. Joining our permanent staff of editors is Administrative Law Judge Isaac D. Benkin as Articles Editor and Steven H. Brose as Book Review Editor. Both men bring broad knowledge, insight and careful judgment to these editorial positions. Peter Kissel and David Bloom continue their years of good service to the *Journal* as the Co-Editors of the Committee Reports.

The last seven years of the *Journal* have been memorable, since it provided me with positive experiences in working with scholars, practitioners and students. Equally important, those seven years have witnessed the *Journal* becoming an established work that is cited by courts, law reviews and practitioners.

The next seven years (and beyond) also should be memorable. The *Journal*, with greater editorial depth, support from NELPI and independent funding, will endeavor to continue being an important and preeminent journal of record for the dynamic field of energy law. I, along with our Bar Association and our readers, look forward to this very bright future.

The Federal Energy Bar Association is a non-profit corporation interested in the development of federal energy law. Founded in 1946 as the Federal Power Bar Association, the Association currently has over 1,500 members. Included in the membership are government, corporate and private attorneys in virtually all areas of federal energy practice. The objective of the Association is "to promote the proper administration of the federal laws relating to the production, development, conservation, transmission and economic regulation of energy." In addition to publishing the *Energy Law Journal*, the Association organizes and sponsors a number of activities, including a continuing legal education program during November of each year, as well as a program held in conjunction with the annual meeting each May which focuses on issues of current interest. The Association also sponsors a number of committees which monitor and report to the membership of developments of interest. Complete membership and subscription information can be obtained from the Association's Secretary at 1615 L Street, N.W., Suite 1000, Washington, D.C. 20036, or by calling (202) 955-6685.

The *Energy Law Journal* is published two times a year. Articles by members and non-members of the Association are welcome. All manuscripts should be of substantial length, deal with aspects of federal energy law and follow *A Uniform System of Citation*. A brief biographical statement should be included. All manuscripts should be sent to William A. Mogel, Editor-in-Chief, *Energy Law Journal*, 888 Sixteenth Street, N.W., Washington, D.C. 20006. The opinions expressed in the published material are those of the writers and are not intended as expressions of views of the Federal Energy Bar Association. Inquiries about advertising or subscriptions to the *Energy Law Journal* should be addressed to Mr. Tiano at (202) 872-5200. The *Energy Law Journal* is indexed in the INDEX TO LEGAL PERIODICALS and the CURRENT LAW INDEX.
