The Energy Bar Association is a non-profit corporation interested in the development of federal energy law. Founded in 1946 as the Federal Power Bar Association, the Association currently has approximately 1,700 members. Included in the membership are government, corporate, and private attorneys in virtually all areas of federal energy practice. The objective of the Association is to "promote the proper administration of the federal laws relating to the production, development, conservation, transmission and economic regulation of energy." In addition to publishing the Energy Law Journal, the Association organizes and sponsors a number of activities, including a continuing legal education program during November of each year, as well as a program held in conjunction with the annual meeting each May which focuses on issues of current interest. The Association also sponsors a number of committees which monitor and report to the membership developments of interest. Complete membership and subscription information can be obtained from the Association at 1350 Connecticut Avenue, N.W., Suite 300, Washington, D.C. 20036 or by calling (202) 223-5625.

The Energy Law Journal is published two times a year. Articles by members and non-members of the Association are welcomed. All manuscripts should be of substantial length, not previously published, dealing with aspects of federal energy law, and follow A Uniform System of Citation. A brief biographical statement should be included. All manuscripts should be sent to William A. Mogel, Editor-in-Chief, Squire, Sanders & Dempsey, P.O. Box 407, 1201 Pennsylvania Ave., N.W., Washington, D.C. 20044-0407. Only manuscripts submitted exclusively to the Energy Law Journal will be considered for publication. The opinions expressed in the published material are those of the writers and are not intended as expressions of views of the Energy Bar Association. Inquiries about advertising in the Energy Law Journal should be addressed to Mr. Miller at (202) 296-2960. The Energy Law Journal is indexed in the INDEX TO LEGAL PERIODICALS, The CURRENT LAW INDEX, WESTLAW, and LEXIS services.

By submitting materials for publication in the Energy Law Journal, you agree that any such materials including articles, notes, comments, book reviews, and committee reports that are published in the Journal are "works made for hire," and you assign all rights in and to those written works to the Energy Bar Association.

To be cited as: 22 ENERGY L.J. ______ (2001).

EDITOR'S PAGE

For almost a year, the California energy crisis has consumed the Nation’s and possibly the world’s attention. In the short term, I am confident that the “on the ground” problems will be solved and Californians will enjoy, albeit at prices that reflect market conditions, electric and natural gas service without the threat of rolling blackouts or brownouts. From the longer perspective, however, California has called into question the role of restructuring or deregulation in the energy industries. Stated in another way, should the California experience be the impetus for a return to traditional public utility regulation of the electric power and natural gas industries?

The current issue of the Journal neither has the answers to these fundamental questions, nor has it provided a salvo of criticism. Instead, what we have done is publish three articles which are thoughtful additions to the ongoing dialogue. It should be added, that these articles do not stand alone, but are a part of a continuum of well researched (and often-cited) writings that have filled the Journal’s pages since its founding in 1980.

As a final word, I am pleased to report, our 16 years of association with the University of Tulsa Law School, have produced an unexpected dividend. Many of the Journal’s student editors have entered the field of energy law and achieved both success and prominence in law firms, government, and energy companies. This phenomena is especially gratifying to those of us who have been associated with the publication of the Journal.

William A. Mogel
Editor-in-Chief
IN MEMORIAM

Stephen L. Grossman, an administrative law judge at the Federal Energy Regulatory Commission since the Commission's inception, died on January 7, 2001 at the National Naval Medical Center in Bethesda, Maryland. He was 65 years old.

When he joined the Commission's Office of Administrative Law Judges in 1975, Judge Grossman had been an ALJ at the Interstate Commerce Commission and the Assistant General Counsel for Regulation of the Department of Transportation. Like all the Commission's judges at that time, he was assigned to help with the heavy burden of numerous natural gas pipeline curtailment cases. He quickly established a reputation for being able to pierce rapidly through the pleadings and arguments, and to get swiftly to the heart of a complex case. As a result, he was successful at achieving many settlements of complex proceedings. He also responded to the participants' need for rapid action on settlements by pioneering the technique of issuing an initial decision, adopting the terms of a mutually agreed settlement, so that when no party filed exceptions, the initial-decision-cum-settlement could take effect within a fixed deadline. See, e.g., Alabama-Tennessee Natural Gas Co., 2 F.E.R.C. ¶ 63,035 (1978), aff'd, 3 F.E.R.C. ¶ 61,027 (1978).

Judge Grossman used his formidable powers of analysis and persuasion to resolve a long-standing dispute over water flows and fishing rights in the Nisqually River in the State of Washington. He presided over the case at the unanimous request of all parties, achieving an uncontested settlement of a convoluted and long-running dispute among Indian tribes, power companies, and environmentalists. His initial decision was accepted by the Commission without change. See Nisqually River Proceeding, 63 F.E.R.C. ¶ 61,026 (1993). Steve Grossman was at his best in important cases involving FERC-licensed hydroelectric projects and was the author of several landmark decisions interpreting the jurisdictional provisions of the Federal Water Power Act. See, e.g., Kennebec Water District, 82 F.E.R.C. 63,004 (1998); City of Centralia, 27 F.E.R.C. ¶ 63,058 (1984), aff'd, 33 F.E.R.C. ¶ 61,221 (1985).

Judge Grossman was active in professional and civic organizations. He taught evidence and trial practice at the National Judicial College and at seminars for state administrative law judges. He served two terms as president of the Federal Administrative Law Judges Conference. Judge Grossman was also a Captain in the U.S. Naval Reserve.

Those who admired his quick, incisive intelligence and his ability to move cases along fairly and expeditiously will miss Steve Grossman.
