

Tricia DeBleeckere is currently a Planning Director with the State of Minnesota on a temporary assignment and returns to the Minnesota Public Utilities Commission in December 2020. In her various roles throughout her 12 years with the state, Tricia worked mainly as a Commission advisor on large energy projects, PPAs, competitive procurements, integrated resource, transmission and distribution system plans, financial settlements and externality valuations. Most recently, her work focused on the development of integrated distribution planning requirements, advanced grid infrastructure cost evaluations, and federal and MISO DER matters. She began her career consulting for 8-years on FERC and state regulatory filings for manufacturing, ethanol, and natural gas transmission and storage clients. Tricia is a member of the NARUC/NASEO Task Force on Comprehensive Energy Planning and is Co-Chair of the Organization of MISO States Distributed Energy Resources Workgroup. She holds a Bachelor of Environmental Science from the University of Minnesota.
