Chris Jones represents clients in the energy industry before the Federal Energy Regulatory Commission and federal courts, focusing on vertically-integrated electric utilities and utility holding companies. Chris has particular experience in energy markets and works routinely on competition-related issues such as mergers and acquisitions, market-based rate authority for generators, organized RTO and ISO markets for energy, capacity and ancillary services (including market design issues), and issues related to the nation's bilateral energy markets. In addition, Chris works on transmission related issues such as transmission rate cases, generator interconnections, OATT compliance and Standards of Conduct, as well as FERC compliance and investigation defense matters.

Chris has previously served as the Vice Chair of the ABA Committee on Restructuring of the Electric Industry and the Committee on Gas and Electricity Marketing. He recently moderated an ABA panel discussion on the Supreme Court's decision in *Morgan Stanley v. FERC*.

Prior to joining Troutman Sanders in 2004, Chris spent several years in the government relations and opinion research businesses and on a national political campaign.
