

Member Benefits

ONE OF THE GREATEST BENEFITS OF EBA MEMBERSHIP IS THE RELATIONSHIPS YOU DEVELOP.

BUILD RELATIONSHIPS

Being an EBA member connects you with a vast network of energy attorneys and professionals, making it easy to share knowledge, get advice and build relationships that can impact your career. Other opportunities to connect include a members-only online community for open discussions related to energy law.

EBA CONNECT

EBA'S online member directory is a powerful networking channel! Retrieve information on lawyers and energy professionals by name, firm, location, field of practice and areas of expertise. When other members are looking for the right person to help with advice or services- you can be the person they find!

RESOURCES THAT MATTER

Members have access to a variety of print, audio, and video resources for research and self-study in EBA's e-library. Membership further includes a subscription to the *Energy Law Journal*- the preeminent law review focused on current energy issues.

GET INVOLVED

Expand your network by getting involved in one of EBA's Steering Committees or Councils or through one of EBA's eight regional Chapters. Build your network through speaking engagements, CLE offerings, leadership roles and informal meet-ups in 2021.

VIRTUAL MENTOR PROGRAM

EBA members have exclusive access to a group of experienced EBA members in a wide range of practice areas and types of practice, for a confidential consultation about career development.

GET AHEAD

EBA will help you advance in your career! In addition to critical high quality programming, networking opportunities and access to compelling content, the **EBA Career Center** provides access to premium job listings in the energy law sector and additional resources for members to navigate their career paths.
