Industries

Energy, Power & Products

Ken Sosnick is a Managing Director in the Power and Utilities practice at FTI Consulting and is based in Boston. Mr. Sosnick has more than 15 years of experience with electric utility, natural gas pipeline and crude/product pipeline industry matters before the Federal Energy Regulatory Commission (FERC).

Prior to joining FTI Consulting, Mr. Sosnick spent over five years as a consultant, extensively engaged in the natural gas, crude/product and electricity markets. His work included analysis of natural gas pipeline and crude/product pipeline cost of service rates, levelized rates, market-based rates, discounted and negotiated rates, incremental vs. rolled-in project costs, initial certificate rates, allocation of corporate overhead costs, master-limited partnership income taxes, throughput/system rate design quantities, fuel recover mechanisms, NGA Section 5 rate complaints, return on equity calculations under the discounted cash flow/risk premium/capital asset pricing model/expected earnings methods, depreciation rate and negative salvage rate calculations, asset retirement obligations, FERC Form 1 and 2 filing requirements as well as being proficient in the application of FERC's uniform system of accounts.

Mr. Sosnick has prepared expert testimony for proceedings at FERC, prepared expert reports assessing and quantifying damages in civil litigation, conducted strategic analysis for a large energy company considering alternatives for its existing pipeline and storage portfolio, written a whitepaper on the impacts of the Tax Cuts and Jobs Act on FERC regulated assets as well as a whitepaper on the impacts of FERC Orders in SFPP, LP Docket No. IS08-390 related to Master Limited Partnerships and other pass-through entities income tax allowance. In addition, he has conducted confidential buy-side valuations and assessments of regulated electric and natural gas utilities in the U.S.

Before working as a consultant, Mr. Sosnick spent 10 years at FERC and spent two years as an auditor in the Office of Enforcement and eight years as an expert witness and a lead technical staff negotiator on major electric utility, interstate natural gas pipeline and crude/product pipeline proceedings in the Office of Administrative Litigation. Mr. Sosnick's insights were incorporated into the revision of the FERC Form 2 in Docket No. RM07-9-000, which lead to the FERC-initiated Section 5 natural gas pipeline proceedings from 2009 to today.

Mr. Sosnick currently teaches an executive FERC Natural Gas 101 course for EUCL and previously taught Practical and Regulatory Training for the Natural Gas Interstate Pipeline Industry at the New Mexico State University Center for Public Utilities, specifically addressing FERC requirements for determining "just and reasonable" rates. Mr. Sosnick holds a B.S. in Accounting from the Indiana University of Pennsylvania. He is a member of the Energy Bar Association, FERC Liquids Committee, FERC Natural Gas Pipeline Committee and FERC Practice Committee.
