

C. Keith Williams

Georgia Power – Telco Colocation Manager

Keith is responsible for overseeing the management of the colocation program for lighting, transmission, telecom towers and land lease for 3rd party build-to-suit. He is also responsible for all subsequent telecommunications product and services. Keith manages the entire process from application to installation, including billing and working through several internal partner groups. He has served in this position for the past 2 years. Prior to rejoining Georgia Power Keith served as the Southeast Utility Director at Mobilitie LLC. In this role he served as the utility liaison with utility companies within the Southeast region of the US. In this role he supported and coordinated the deployment of small cell attachments and installations.

Keith joined Georgia Power in 2005 and has served in various areas of Project Management and as the Operational Performance for Southern Company. He earned a Bachelor of Arts in Biology from the University of Louisville and a Masters of Public/Business Administration from Jacksonville State University
