

I have been involved with the energy industry for about 50 years. I have worked for the Department of Energy funding of the DOE's Eastern Interconnection States' Planning Council as Chief Economist. I worked as Chief Economist for the Indiana Utility Regulatory Commission prior to working for EISPC. After the EISPC project, I returned to the Indiana Commission as Chief Technical Analyst. I have worked for Houston Lighting and Power (now CenterPoint), Arizona Electric Power Cooperative as manager of rates, Tri-State Generation and Transmission as manager of rates, and the Kansas Corporation Commission as Chief Economist.
