

Amanda Jepson

Xcel Energy Nuclear Strategic Regulatory Policy Manager

Amanda Jepson joined Xcel Energy in 2002 as an Instrumentation and Controls Engineer at Prairie Island and has over 19 years of experience in the Nuclear Industry. Throughout her career, she has held various leadership roles at Prairie Island Nuclear Generating Plant. In her current role as Manager of Nuclear Strategic Regulatory Policy for Xcel Energy, she interfaces with government and industry organizations at all levels that enact, implement or influence policies that impact Xcel Energy's nuclear power plants and spent nuclear fuel storage. Her team is currently leading the state filings to extend the company's existing nuclear fleet. Her other key positions have included Director of Site Performance and Operations Support, System Engineering Manager, Instrumentation and Controls Maintenance Manager, Strategic Planning Specialist, and Licensed Operator Instructor.

Amanda is a graduate from the University of Minnesota with a Bachelor of Science in Electrical Engineering and a Master of Business Administration from Cardinal Stritch University.
