

2025-2026 EBA SECTOR REPORTS REQUIREMENTS AND GUIDANCE

There are two different deadlines for sector reports each year to reflect the fact that the Journal is published twice each year. Committees, as constituted for the June 2025 to- May 2026 period, are responsible for submitting reports due by August 1, or January 5, 2026. If you are an incoming steering committee chair, please coordinate, as necessary, with your Committee's outgoing chairs to ensure that reports will be prepared and submitted covering the relevant time periods, as set forth below.

The following sector reports are due on or before August 1, 2025, and, unless noted otherwise, should cover developments occurring from July 1, 2024, through the end of June 2025, with outlines of the reports due on or before June 16, 2025:

<u>Subject Matter:</u>	<u>Steering Committee:</u>
<i>Demand-Side Resources & Smart Grid</i>	<i>Electricity</i>
<i>Environmental Regulation</i>	<i>Electricity/Gas, Oil & Liquids</i>
<i>FERC Practice</i>	<i>Practices</i>
<i>International Energy Law & Transactions</i>	<i>Transactions, Finance & Investment</i>
<i>Natural Gas</i>	<i>Gas, Oil & Liquids</i>
<i>Nuclear Regulation</i>	<i>Electricity</i>
<i>Power Generation & Marketing</i>	<i>Electricity</i>

The following sector reports are due on or before January 5, 2026, and should cover developments occurring in 2025 (through the end of December 2025), with outlines of the reports due on or before November 17, 2025:

<u>Subject Matter:</u>	<u>Steering Committee</u>
ADR & Consensus-Building	Disputes & Resolution
Compliance & Enforcement	Disputes & Resolution
Electricity	Electricity
Finance & Transactions	Transactions, Finance & Investment
Legislative Practice	Practices
Oil & Liquids	Gas, Oil & Liquids
Renewable Energy	Electricity
State Commission Practice	Practices

The outline of the topics and major cases, orders, etc. that will be included in your Committee's report should be provided to the Senior Reports Editor, Lois Henry (Lois.Henry@bhegts.com) by the applicable deadline specified above.

The outlines will assist us in avoiding duplication among the reports, planning for the Journal's timely publication, and avoiding the need to defer publication of your sector report to a later issue of the Journal.

Draft sector reports will be reviewed and edited by the Senior Reports Editor and Reports Editors, as well as by the student editors at the University of Tulsa College of Law. Your Committee will have the opportunity to review all changes prior to publication.

Please note that sector reports are published as part of the online version of the Journal but are no longer included in the printed Journal. This change was made to help to contain the Journal's costs and to benefit the environment.

When preparing your reports, please adhere to the following requirements.

I. SUBSTANTIVE CONTENT

- **The EBA does not take a position in any sector reports on substantive issues that are the subject of pending litigation or are in (or capable of) dispute, nor does it make predictions. Therefore, you must provide straight-forward descriptions of the matters contained in the report and not editorial comments on any topic (or on the merits or expected outcome of any pending matter.)** A "report" is just that, a recitation of developments without editorial comment and with no viewpoint expressed. This is what distinguishes the reports from articles, notes, and book reviews published in the Journal. Reports should identify critical cases, orders, statutes, proceedings, proposals, and other pertinent matters for the relevant time period.
- In the opening paragraph of the report, identify the time period covered.
- The Journal is primarily for practitioners, so you need not provide extensive background information on every matter.
- Minimize the reporting of material from a prior period. For example, a discussion of a regulatory proceeding or court case should avoid a detailed analysis of orders or rulings issued in prior years.
- A report should not address committee activities but rather the subject matter that the committee covers (such as renewable energy, natural gas, etc.).
- If you are concerned that your report may duplicate matters to be contained in another report, consult with the chair of the Committee (s) whose report concerns you and with the Senior Reports Editor.
- Please allow all committee members to participate in the preparation of the report and recognize that all committee members will be listed at the end of the report. However, when individual committee members have contributed significantly to the report, identify such members in a footnote on the first page of the report so appropriate credit can be given.

II. PROPER CITATIONS

- **Provide accurate citations throughout the report to facilitate the editing process and to enable those who read the report to access your cited sources easily.**

- All quotations from cases, orders, statutes, and other sources must be identified as quotations and must include proper citations. Computers have made it very easy to copy text and insert it in a report. **We will not publish reports that do not include appropriate citations for quotations and other references to the content of materials referred to in the report.**
- Citations must conform to the most recent edition of The Bluebook – A Uniform System of Citation.
- All citations must appear in footnotes at the bottom of a page, rather than in the text.
- When referring to discussions infra or supra, reference the subsection of the report rather than the page number.

III. **FORM**

- Reports vary in length, but **we will not publish reports of more than 50 pages absent extenuating circumstances**. The best reports are concise yet informative.
- Reports must be double spaced in Microsoft Word and use the same type size and font in both the footnotes and body of the report (12 pt., Times New Roman).
- Organize the report so that the headings and subtitles are consistent in all sections, even though different committee members may prepare parts of the report.
- As noted above, indicate the period covered by the report at the beginning of the report.
 - E.g., “This report summarizes antitrust and competition developments of particular interest to energy law practitioners that occurred from July 1, 2018, to June 30, 2019.”
- Include a Table of Contents at the beginning of the report after the opening paragraph; do not include case or order cites in the Table of Contents and do not include a Table of Authorities.
- As noted above, include a footnote at the beginning of the report identifying individuals who significantly contributed to the report.
- Include a list of all committee members at the end. Please double check the list for accuracy as EBA may have revised the list since you received it.

Thank you in advance for your cooperation. Your efforts to prepare comprehensive and accurate sector reports contribute significantly to the Journal’s value and are much appreciated. If you have any questions, please do not hesitate to contact us.
